

RAMYA S

AI / LLM Engineer | Python Developer | AI Automation

Karnataka, India | 8123414593 | rramyas173@gmail.com | [linkedin.com/in/ramya-s-857b97333](https://www.linkedin.com/in/ramya-s-857b97333) | github.com/ramyas170302

PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA 9.50/10) with hands-on experience building and deploying AI-powered products, including LLM-based applications, n8n automation pipelines, REST API integrations, and live ML web apps. Skilled in Python, LangChain, prompt engineering, and Retrieval-Augmented Generation (RAG), with a track record of shipping projects that have real user traction. Seeking an internship or full-time role as a Software Developer, ML Engineer, or AI Automation specialist.

TECHNICAL SKILLS

AI & LLM: LangChain · Retrieval-Augmented Generation (RAG) · Prompt Engineering · Groq API · Hugging Face Embeddings · FAISS · Generative AI

Programming & Web: Python · Java · C · SQL · HTML/CSS

ML & Data: Scikit-learn · Pandas · NumPy · Matplotlib · Decision Trees

Frameworks & Tools: FastAPI · Streamlit · n8n · Lovable AI · Git · GitHub · VS Code

PROJECTS

AI Placement Mentor (Placify) — *Python · Streamlit · LangChain · Groq API*

Live demo: aimlearning-obthvpgaejwpcahrkdvui.streamlit.app

- Built an AI-powered placement mentor platform delivering personalized interview preparation and feedback.
- Designed LLM-driven conversational flows using LangChain and the Groq API for low-latency responses.
- Built a user-friendly Streamlit interface for interactive interview practice.

MediGuide AI — Medicine Information App — *Lovable AI · Prompt Engineering*

Live demo: medidocsuggestion.lovable.app

- AI-powered medicine search tool covering purpose, dosage, and warnings — shipped rapidly using an AI-native platform and structured prompt engineering.
- Attracted 61 organic visitors and 154 pageviews (2m 15s avg. session) with zero promotion.

n8n Automation Workflows — *n8n · REST APIs · External Data Integration*

- Built two production automation workflows from scratch, without templates — a book recommender (multi-step API calls on user preferences) and a crop advisory tool (live weather & soil data via REST APIs).

Mental Health Risk Prediction System — *Python · Scikit-learn · Decision Tree · Streamlit*

- Built an end-to-end ML app predicting Low/Medium/High mental health risk from 7 input features.
- Trained a Decision Tree model on a self-collected dataset and deployed it live on Streamlit.
- Designed an interactive UI that surfaces risk-based health suggestions.

Student Performance Analyzer — *Python · Pandas · Matplotlib · Seaborn*

- Analyzed a 2,000-student Kaggle dataset — data cleaning, outlier detection, and correlation analysis to surface academic performance patterns.

EDUCATION

B.E. Computer Science & Engineering — **Malnad College of Engineering**

CGPA: 9.50 / 10 | Expected Graduation: June 2028

ACHIEVEMENTS & CERTIFICATIONS

- IBM Prompt Engineering Certification & Generative AI Completion Certification (2026)
- GeeksforGeeks Institute Rank #21 @ Malnad College of Engineering (2026) · Smart India Hackathon (SIH) Participant (2025)
- 90+ problems solved across LeetCode (54) and GeeksforGeeks (36)
